

先两步 永远的

① ¹ TestSubject

{ do: private classUnderTest → classUnderTest
= new ClassUnderTest();

② ² Mock

private Collaborator mock;

③ ³ Test

Specification of
the behavior

Student student;
expect(mock. enroll(student)).
andReturn(true);

④ ⁴ replay(mock); ⑥ ⁶ verify(mock);

⑤ ⁵ 对SLIT方法的执行

↓
classUnderTest. use
(student, enroll mock);
assert ...
